

Camp Primary School (Years 3 - 6) LEGO Robotics Club

EDUCATE AND STIMULATE YOUR CHILD THROUGH PLAY

Children love playing games, whether they are computer games, console games or electronic games. Would you like your child to learn about how these games operate through a LEGO Robotics after school club program?

Designed for children in years 3 and above, our club will teach them how to build various robots and explain how we use robots in the real world. There will also be an element of basic programming. The last week of term will result in the children taking part in an exciting game of Robot Wars...May the best builder win!!!!

Using LEGO® Mindstorms® children can build simple robots and then each week they can build more and more powerful robots. Newly designed course so that all models can be built within 30 - 45 minutes and then 15 minutes to learn and play with their working models.

Monday 29th April – 8th July 2019
(9 sessions @ £5.00 per session)
3.30pm to 4.30 pm

The total cost is £45.00 and an email to laura@hg-education.com with your child's name and year and club they want to join along with the school name and we will reserve your child a place. We will then send electronic links to you so that you can pay online.

PLACES ARE ALLOCATED ON A FIRST COME, FIRST SERVED BASIS.
